BRUTUS[®] UNLEASHED

More power

With a larger engine to deck ratio, more power is transferred to the deck. So you get greater cutting efficiency without sacrificing cutting speed.

Long lasting pumps

Cooling fans teamed with our twin 12cc hydraulic pumps run cooler, extending the life of the hydraulic system. And coupled with larger engines, they help produce more torque and speeds up to 12 mph.

Comfort

Brutus features a full-suspension, high-back seat with retractable seat belts. Allowing you to comfortably mow for hours.

Solid spindles

The deck spindle features a solid shaft design for greater strength and a longer life. Not to mention easier assembly and maintenance when needed.

Control levers

Our between-the-leg control levers are easy to operate with just one hand. They also allow you to get on and off the mower quickly.

Lower, lighter, faster

Brutus has a lower center of gravity, giving it excellent traction and stability in rolling terrain. It is also lighter in weight and faster on the turf.

Efficient

Brutus has a single 8 gallon tank, making it a less complex mower.

ROPS bar optional
